Aniketh Vustepalle

AI Product Designer · Design Systems + React · Intelligent interfaces
@ PanTerra Networks · MTech Applied AI, VNIT
Hyderabad, Telangana, India

Summary

I design intelligent interfaces — and I build them. As a UI/UX Designer at PanTerra Networks, I led the end-to-end redesign of two enterprise platforms. What sets me apart: I don't just design for AI — I understand how it works underneath. Currently completing an Executive MTech in Applied AI at VNIT Nagpur, where my major project is a RAG-based Legal Contract Analyzer for Indian SMBs — combining InLegalBERT, a Clause-Statute Knowledge Graph, and a Figma-designed interface built for non-technical users. Outside of work, I'm building the Bhagavad Gita App (React Native + Expo) — a gamified scripture platform with a Coins economy, audio narration, and daily verse widgets. It's how I stay sharp on product thinking and mobile-first design. My edge at the intersection of design and AI: → I can read a RAG pipeline and design the error states for it → I can write a React component and critique its accessibility in the same session → I've shipped HITL (Human-in-the-Loop) AI systems — not just read about them. I write about AI product design, design systems, and what actually breaks when you ship intelligent interfaces. Open to: remote product design roles, AI-native SaaS teams, and contracts where design quality is non-negotiable. Portfolio: aniketh703.github.io/portfolio/ GitHub: github.com/aniketh703

Experience

PanTerra Networks

1 year 1 month

Associate - UI/UX Designer

November 2025 - Present (7 months)

Hyderabad, Telangana, India

User Experience Designer

May 2025 - November 2025 (7 months)

Hyderabad

UX Designer at PanTerra Networks, focused on designing responsive interfaces and improving user experience across digital platforms. Skilled in Adobe XD, Figma for wireframing, prototyping, and high-fidelity UI design. Collaborates with cross-functional teams to deliver user-centered solutions aligned with business goals. Experienced in usability testing, design systems, and front-end handoff.

Q-DITS

Data Acquisition and Tools development intern

September 2024 - December 2024 (4 months)

During my internship, I worked on:

- Redesigning the company's website
- Worked with the SEO team to boost the website's traffic
- Analyzing large data sets for stock market analysis
- Assisting with the UI for an S3 bucket project
- Developing a GUI for syncing stock market data
- Preparing proper documentation
- Working on a project that generates PDFs according to company preferences

InternPixel

UI/UX designer

February 2024 - March 2024 (2 months)

During my tenure as a Figma UI/UX Designer Intern at InternPixel, I had the opportunity to contribute to various aspects of web application design and development. My responsibilities included collaborating with both design and development teams to create visually appealing and user-friendly interfaces for web applications. I utilized Figma extensively to design and prototype user interfaces, ensuring alignment with user experience principles.

Bharat Intern

Web Developer

September 2023 - October 2023 (2 months)

Hyderabad, Telangana, India

- Developed and maintained web applications utilizing HTML, CSS, and JavaScript, ensuring high-quality and responsive designs.
- Participated in code reviews and collaborated with senior developers to enhance coding practices and improve technical skills.

- Successfully delivered 3 projects within the internship period, meeting all deadlines and contributing to team objectives.

Education

Sri Chandrasekharendra Saraswathi Vishwa Mahavidyalaya,
Kancheepuram

Bachelor of Engineering - BE, Computer Science · (December 2020 - July 2024)
